

La Sierra Avenue/State Route 91 Interchange Improvements

Construction of this \$38 million project will commence in October 2007 and is scheduled for completion in July 2009. The project will extend from Diana Avenue/Montlake Drive to Indiana Avenue. Approximately 3000 feet along State Route 91 will also be affected by the project.

Construction of the project will enhance the capacity and operation of the interchange. Both the freeway and the railroad bridges will be replaced with six lane structures including dual left turn lanes. The freeway ramps will be widened to three lanes. The areas surrounding the ramps will be landscaped.

La Sierra Avenue will remain open to traffic during construction; however there may be short periods of time when traffic lanes will be closed. Periodic night-time freeway closures and limited ramp closures are expected. Access to properties along the project will be maintained during construction.

For more information, call the City of Riverside Public Works Department at (951) 826-5670 or visit the City's website: www.riversideca.gov
